GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

(New pump, enlarged diversion dam, location of diversion, etc.)

None

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES  NO   
 Describe any water conservation efforts you have initiated:  
 \_\_\_\_\_

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:

Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG)

Reduction in consumptive use:

Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG) Year \_\_\_\_\_ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES  NO

We above discuss this provision is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office.

(3) Appropriation of Water in California. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office.

Exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new application upstream from their divisions, and (3) assists the State to determine if additional water is available for future appropriators.

An appropriate right is required for use of water by riparian and pre-1914 appropriators. Since 1914, new appropriators have been required to obtain a permit and license from the State. There is a surplus not needed by riparian water users. Generally, appropriative rights may be exercised only when there is a surplus of water for storage of water. Generally, appropriative rights may be granted to the natural stream system.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been served by another riparian user. They are riparian and appropriative rights.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

WRIWS UPDATED  
KRM

Big Redwood Park Water & Improvement Assoc.  
18375 Main Blvd, Los Gatos, Ca. 95033

Dear sir:

This diversion (#5010225) is one of four belonging to Big Redwood Park. I have lived in this community for 20 yr and knew the status and location of three of these diversions. I am the manager of our water system, and due to some recent problems I now know the location and use of the fourth diversion.

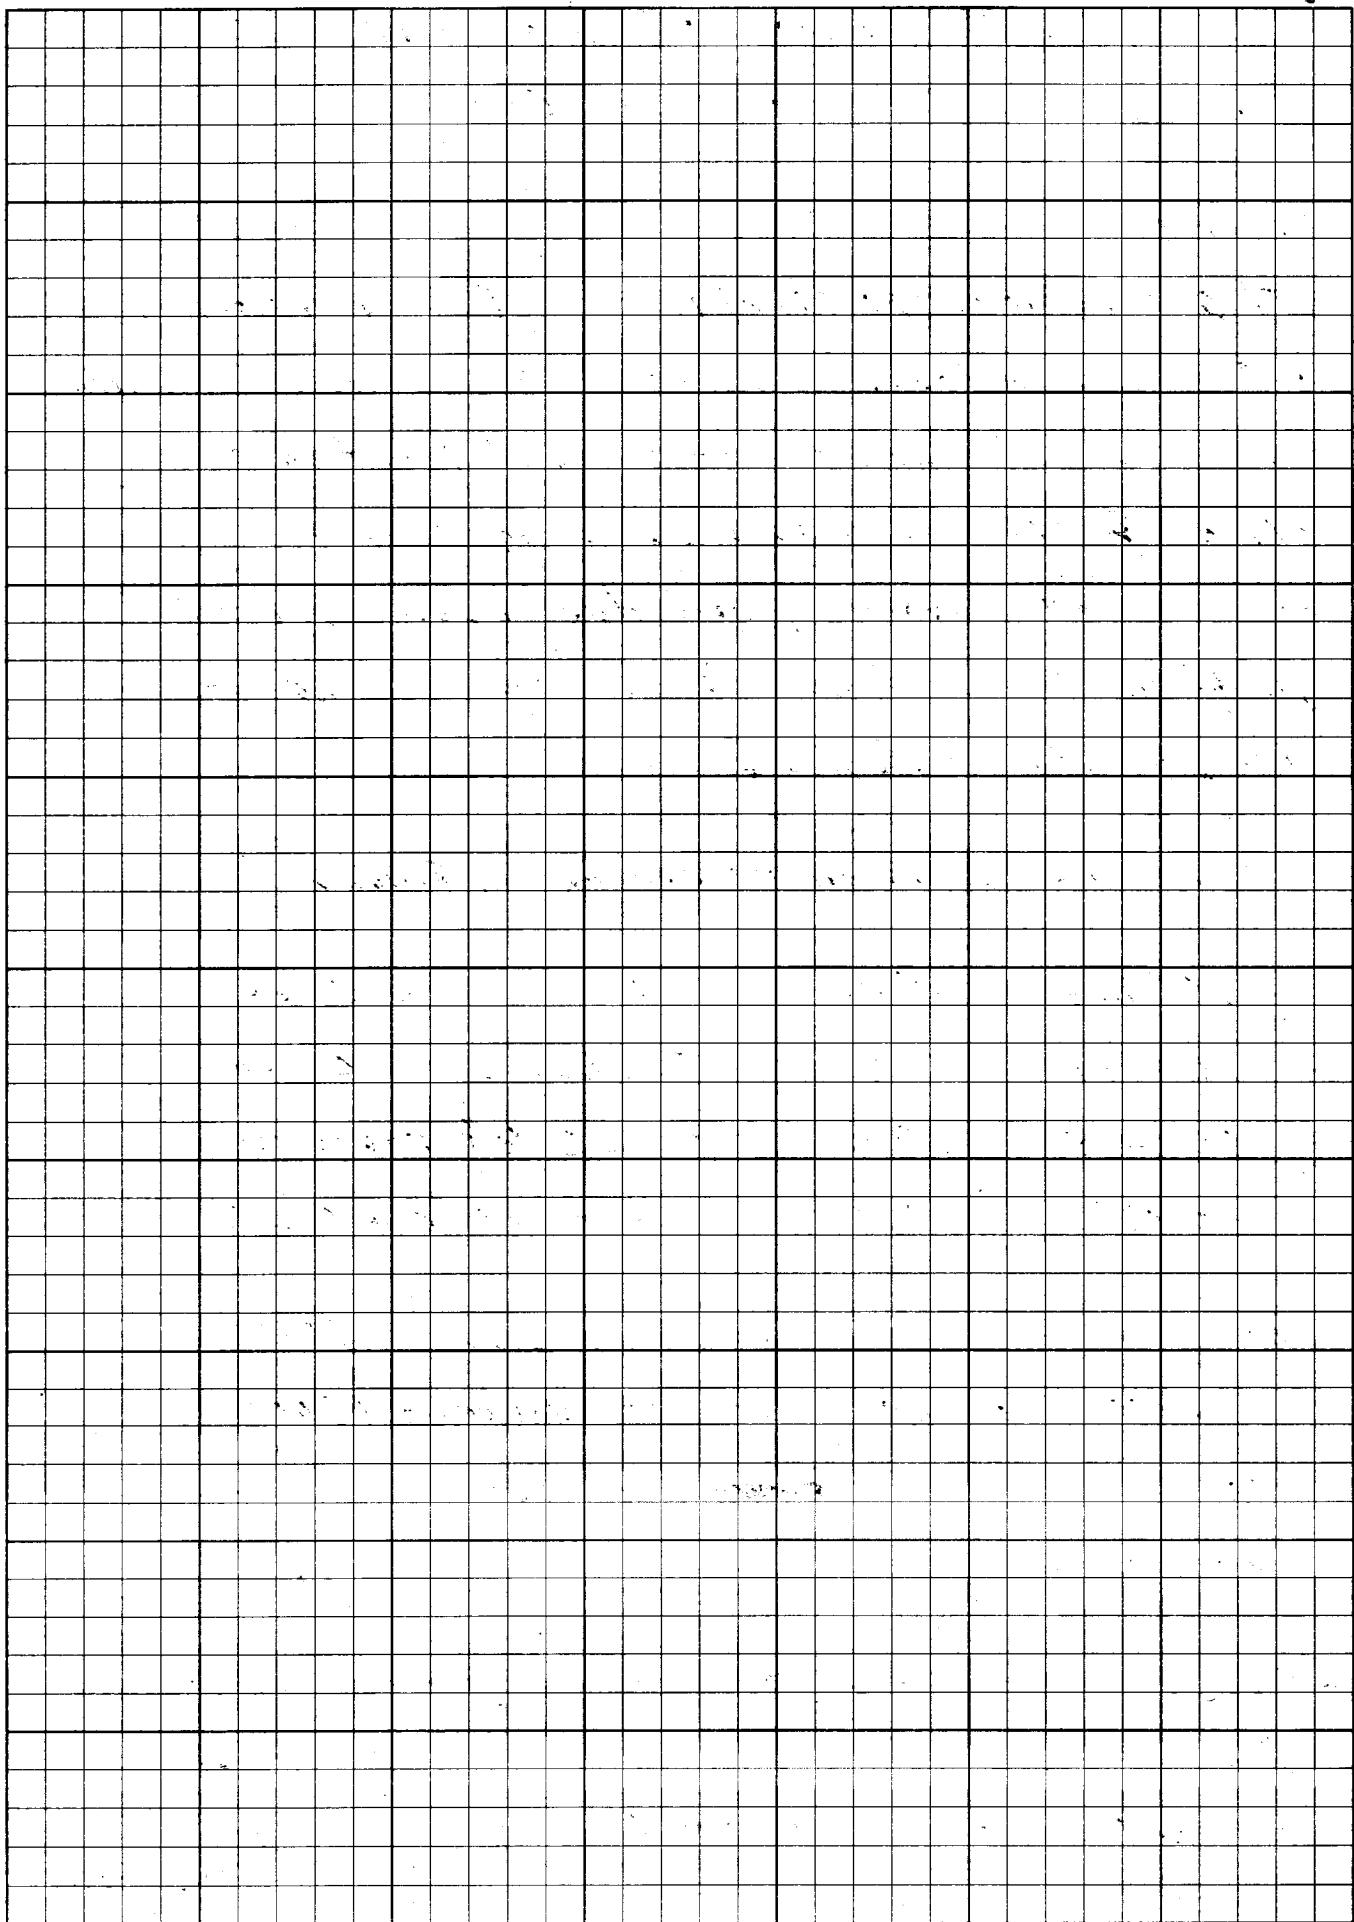

The diversions on record are as follows

500816	1926	Tributary to Bean Creek
500817	1926	Tributary to Bean Creek
500818	1926	Bean Creek diversion
5010225	1930	Tributary to Bean Creek

The water from the diversion enclosed (5010225) is piped into the reservoir of diversion (500817) to the best of my ~~best~~ knowledge and investigation, along with all other sources, including wells.

If you send me the forms for the other three diversions, I can now update them as to their current usage and location by tax parcel number.

Sincerely  
Robert P. Hobble  
Water Manager

See back of page for General Information. If there is insufficient space for your answers,  
 please number them in the space provided on the back of this form.

There are two principal types of surface water rights in California, riparian and appropriative rights.

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

We appreciate your interest in water rights in California. If you have any questions, please do not hesitate to contact us.

Water rights in California are governed by the doctrine of "prior appropriation". This means that the first user to put water to a beneficial use has the right to use it before subsequent users. The doctrine of prior appropriation originated in California in 1852, and it remains the law today. It is based on the principle that water is a scarce resource and must be used efficiently and effectively. The doctrine of prior appropriation also provides a mechanism for resolving disputes over water rights between different users.

The doctrine of prior appropriation applies to all surface water in California, except for certain limited exceptions. These exceptions include groundwater, which is not subject to the doctrine of prior appropriation, and water rights held under federal or state law, which are governed by different rules.

Under the doctrine of prior appropriation, a water right is created by putting water to a beneficial use. This can be done by diverting water from a stream or reservoir, or by pumping water from a well. Once a water right is created, it can be sold or transferred to another user, provided that the new user has a valid claim to the water.

Water rights in California are regulated by the State Water Resources Control Board. The board oversees the administration of water rights and ensures that they are used in a responsible manner. It also enforces laws against waste and misuse of water.

If you have any specific questions about water rights in California, please feel free to ask. We are here to help.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statement of Water Division and Use"  
"Information Pertaining to Water Rights in California"  
"Water Rights for Stockpond Construction Prior to 1969"  
"Appropriation of Water in California"

Statements of Water Division and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus of water. Since 1914 new appropriators have been required not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statement of Water Diversions and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water diversion concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Information Pertaining to Water Rights in California", "Water Rights for Stockponds Constructed Prior to 1969", "Statement of Water Diversions and Use", "Appropriation of Water in California", and "several pamphlets available. They include:
